# Data Science Lifecycle

8/21/2023 - Q1M1C2

Data science is the process of analyzing data sets to understand data
Data scientists need to communicate data to all different people
Data scientists turn raw data into meaningful data

I feel 'B' is the correct option, as you don't always have something to wrangle, and can go back to wangling after trying to analyze.

Class is very split, with the random selector picking on our table.
It's very fluid, but these are the ~6 steps
